

Cyfy 2016

Digital Asia Scripting
the New Governance Order

The India Conference
on Cyber Security &
Internet Governance

28th–30th September
The Taj Mahal Hotel
New Delhi

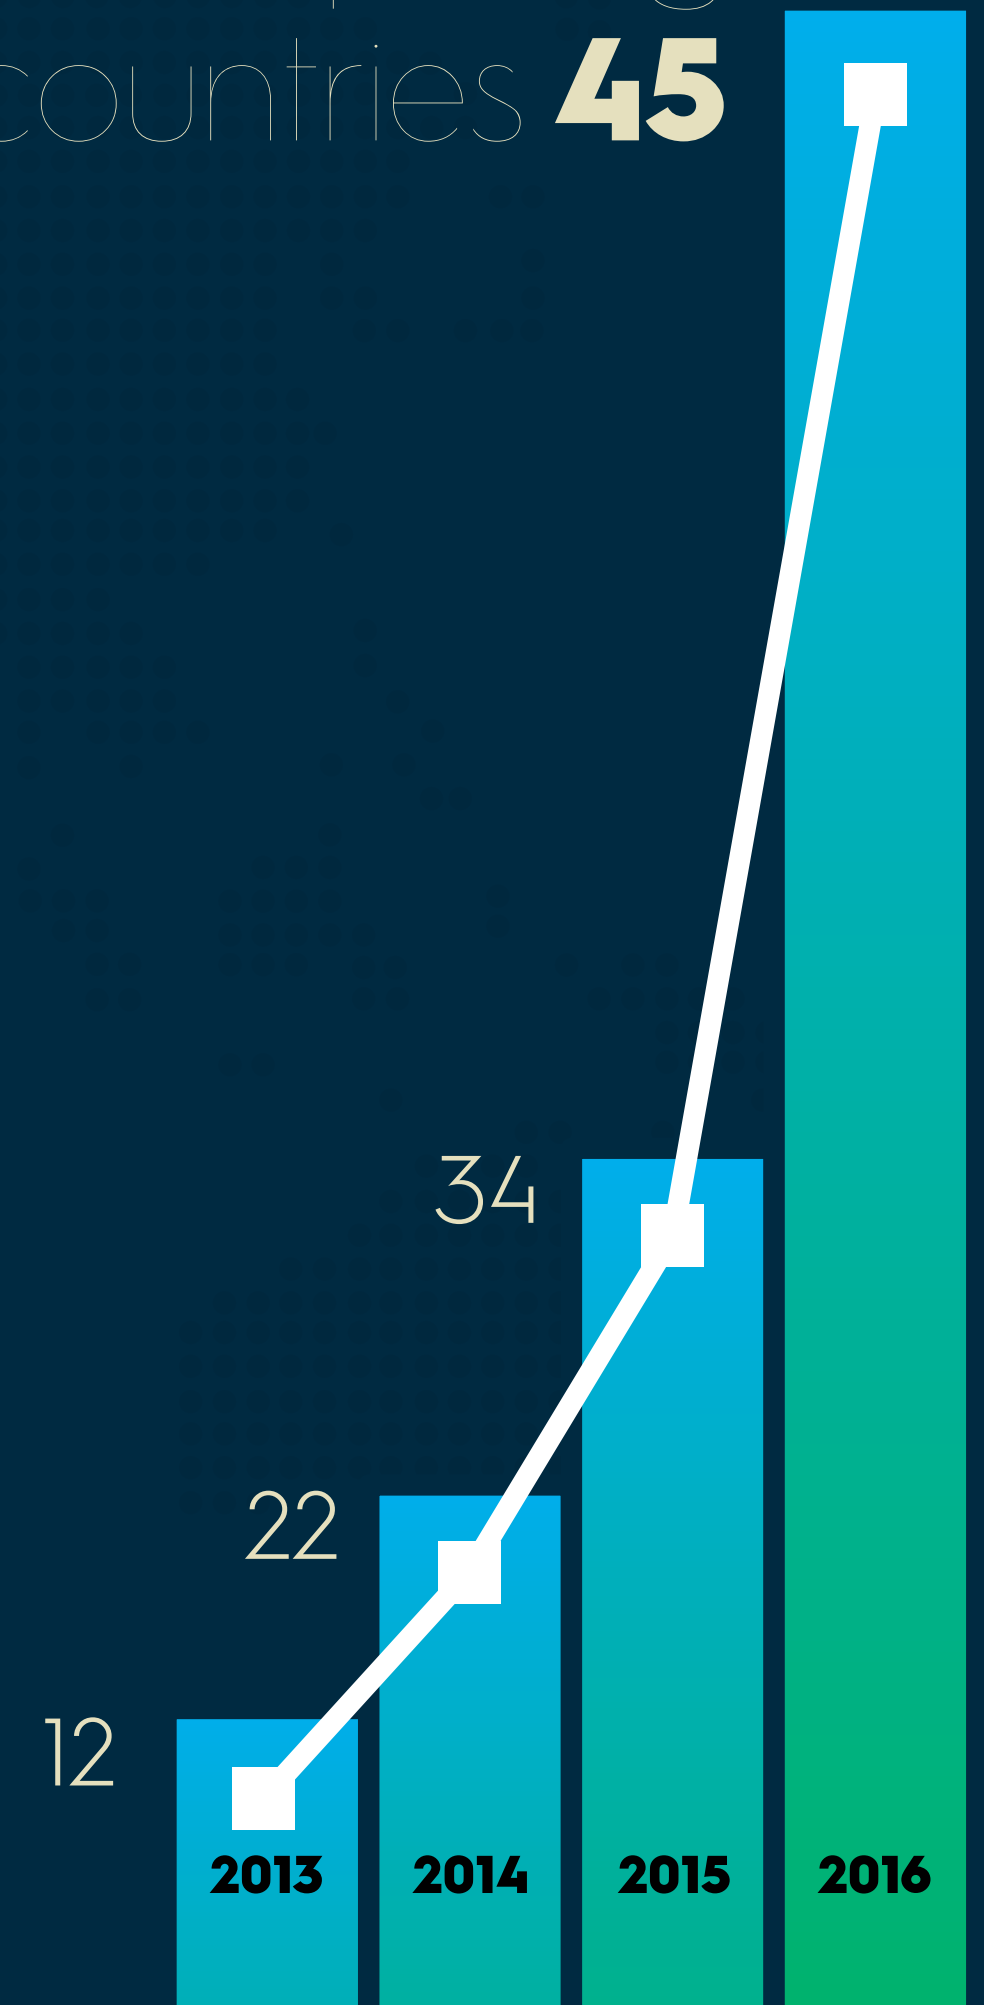

CyFy 2016

Into its fourth edition this year,

CyFy: The India Conference on Cyber Security and Internet Governance has emerged as a global platform to discuss, debate and deliver digital policy solutions. CyFy 2015 featured nearly 110 participants from over 33 countries, with nearly 800 delegates in attendance. Prominently, the conference sessions featured several experts from Africa and the Asia Pacific, who addressed the policy priority of connecting the next billion. The 2016 iteration of CyFy will highlight the political, economic and strategic questions that underpin this imperative.

Asia has become the digital pivot of the world. The region today hosts the fastest growing digital economies. It has become the site for the creation and evolution of cyber norms. Nation-states in the Asia- Pacific have also enhanced their cyber capabilities, awakening the possibility of conflict. Is Asia set to incubate the new digital governance order? What rules of the game will define state and non-state engagement in the region? The answers to these questions will illuminate the way forward not just for Asia but also for the world, as governments, businesses and civil society attempt to create regimes to govern the internet. Therefore, we are pleased to announce the theme for the 2016 edition of CyFy – “Digital Asia: Scripting the New Governance Order” Digital Economy: Taking stock of legal, regulatory and economic aspects of digital development in India and the Asia Pacific, as well as the development of frontier technologies in the financial sector and Internet of Things.

Number of Participating countries **45**

CyFy 2016

Five pillars of discussion that will shape the panels, roundtables and interactions

Digital Economy

Taking stock of legal, regulatory and economic aspects of digital development in India and the Asia Pacific, as well as the development of frontier technologies in the financial sector and Internet of Things.

International Engagement

Evaluating the progress made by intergovernmental and multistakeholder platforms on cyber norms, such as the UN Group of Government Experts on ICT security, the Tallinn Manual 2.0, and various regional initiatives.

Cyber Security

CyFy 2016 will host two to three sessions on encryption, critical information infrastructure, Mutual Legal Assistance Treaties (MLATs), lethal autonomous weapons and supply chains integrity in Asia.

Access & Inclusion

Fostering ongoing conversations around safe and accessible electronic platforms for marginalised communities, and policy recommendations on making digital spaces more inclusive. Conference sessions would also focus on the contribution of women in leadership roles who have leveraged technology for successful social, political or entrepreneurial goals.

Capacity Building

CyFy's capacity building module will essentially weave the four themes together, and use the conference as a platform to bring together 20-25 ICT specialists from Africa and the Asia Pacific for interactive workshops and roundtables on accessible and affordable internet access for the next billion users.

CyAy2016 Speakers

Ravi Shankar Prasad

Minster of Law and Justice and
Information Technology

Aruna Sundararajan

Secretary, Ministry of Electronics and
Information Technology

Gulshan Rai

National Cyber Security Coordinator

Angela McKay

Director, Cybersecurity Strategy and
Diplomacy, Microsoft
